

Simple, robust

pulse meter

3700

British made

The 3700 consists of an S1 mechanical coin acceptor housed in a secure ABS case. The single coin acceptor is factory adjusted for coins or tokens in the diameter range 17 -30 mm. The following security checks are undertaken

- Diameter
- Thickness
- Ferrous content
- Roundness
- Underweight
- Washers
- Tilting
- Coin on cotton

The 3700 is a coin or token operated device that gives a pulse output for each coin or token inserted. It is intended for use with electrical or electronic equipment that requires a pulsed input to start.
