

Take Control and increase income

Applications include

- Sunbeds
- Saunas
- Lighting for pool and snooker tables
- Lighting for squash and tennis courts

Low Cost Reception Unit (LCR)

The LCR is a low cost entry-level unit that can operate as a stand-alone timer or be connected together to control up to a maximum of four units.

When connected together one LCR acts as the reception unit and the other LCR units act as the equipment controller and remote display. The LCR is an extremely cost competitive reception control system and gives operators who could not normally afford reception control an opportunity to install a simple console system with reduced features.

Sigma PC

The Sigma PC is a mid range reception control which displays the status of one bed at a time, up to a maximum of 16. It is particularly effective if linked to a PC running third-party booking software. Sixteen lights display which equipment is in use and an LCD shows the time remaining and general status of any one piece of equipment.

Calibre

The top of the range Calibre system displays the status of nine beds at a time, up to a maximum of 64, with an easy to use touch-screen display.

Both the Calibre and Sigma PC systems have three parts – the reception console, a remote display and an equipment controller.

Reception Control Systems

Take control of your operation by installing a Reception Control System from LCI. We offer three systems, all of which are used extensively by leisure operators to control time allocation and to maximise income generation.

The following list compares the three reception control systems

Feature	LCR	Sigma PC	Calibre
Maximum number of controlled units	4	16	64
Remote start and stop facility	✓	✓	✓
Immediate start facility	✓	✓	✓
Delayed start facility with over-ride	✓	✓	✓
Client initiated start facility	✗	✓	✓
Computer Interface	✗	✓	✓
Third party software available	✗	✓	✓
Failsafe to warn of malfunction	✗	Optional	Standard
Flush mounted remote display	✓	✓	✓
Touch screen reception control	✗	✗	✓
Maximum units displayed at reception	1	1	9
Emergency stop	✓	✓	✓
Provision of usage statistics	✓	✓	✓
Monitoring of income against time used	✗	✓	✓
Session control	✗	✓	✓
Easy to programme	✓	✓	✓
May be linked to Wyvern 2000CN	✗	✗	✓
